

Refresh your mind, ignite your senses with a little pampering

Introducing the all new **K1-series** instant water heater from KPi Electrical. An innovation with a minimalist and smart design that reflects simplicity yet boasts practical functions. Easy to use, safe and reliable, every part is designed to inspire better living.

It comes with LED digital temperature display with temperature select, a unique feature to ensure you always get the ideal temperature for a blissful and refreshing shower. What's more, it provides heating on demand which simply means you only turn on when you need hot water. This not only helps you save energy but money too. Furthermore, with its compact, wall-mounted design, you also get to save space that allows for additional storage and flexibility. The **K-1 series** instant water heater is available in 4 exciting colours - Champagne, Ocean Blue, Forest Green and Silver Grey. Choose your favourite colour and start pampering yourself.

Safety features

LED digital temperature display with temperature select

- Ensures accurate setting of the ideal temperature
- Helps save energy

Electronic water temperature control

- Keeps the heat level automatically regulated to prevent scalding

Flow switch system

- Only operates when there's sufficient water flow

Thermal cut-out

- Provides over-heating protection by automatically cutting off the power supply if there's an abnormal rise in shower temperature
- Prevents fire hazard

Double safety device

- Double action thermostat automatically shuts off water temperature drops to a certain level

Built-in Earth Leakage Circuit Breaker (ELCB)

- Automatically cuts off the power supply in the event of current leakage exceeding 10mA
- Prevents electric shock with built-in safety functions

Splash proof casing (IP25 International Standard)

- Prevents water from getting into the heater and damaging the unit

Booster pump with water pressure control

- Controls the water flow to help save water

Specifications

Heater Power Rating	3.8KW 240VAC 50Hz
Motor Power Rating	100W 12VDC 50Hz
Water Connection	1/2" UNF (1/2" BSP)
Operating Condition	Open Water Mode
Water Temperature Control	Electronic
Degree Of Protection	IP25 (Anti Leakage Circuit Breaker ELCB)
Minimum Flow Rate	1.1 l/min/minute
Minimum Water Pressure	0.2 bar (0.2 kg/cm ²)
Maximum Water Pressure	0.8 bar (0.8 kg/cm ²)
Heater Net Weight	4.3 kg
